

Frequently Asked Questions

Who gets a device and how long will they have it?

Every student will receive a device. Students will have the device until the end of the school year.

Can students take their devices home?

Yes- students are permitted and encouraged to take their device home. Students are encouraged to use their devices to complete classroom assignments. It is important for students to bring their fully charged device to school every day, though.

Will students be able to purchase apps for their Chromebook?

No- students will not be able to do this. The teacher will advise students if they need any of the third-party apps/extensions and the IT department will install them.

What happens if the device gets damaged or lost?

Any issues should be immediately reported to the school. Students should take the device to the IT department so that it can be inspected. Parents and students will be responsible for any repairs/replacement costs. A stolen machine should be reported by the parent/guardian to the police.

Is it required that there be an Internet connection at home for students to use the device?

No-students can download work at school and complete work on the machine from home. However, an internet connection is highly recommended as many of the assignments are posted to Google classrooms and accessed via the Internet.

What type of filtering of website will occur? Is monitoring software installed? What does Google do with the information about a child's online activity?

All devices are connected to the JASD network. Parents and guardians are responsible for monitoring your child's Internet activity and use of the device at home. Chromebooks taken off school grounds will also be monitored via Go Guardian. Students are still responsible for complying with the Acceptable Use Policy while off campus. Devices are subject to search at any time for inappropriate use. Student account activity is not sold to outside providers by Google.
